-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 20, 22 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each claim refers to "hole transport material" and "electron transport material" where no antecedent basis for these terms is previously presented in the body of the claim.

Claim Objections

3. Claims 5 and 6 are objected to because of the following informalities: they depend from a cancelled claim. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3, 5, 6, 8-12, 15-20, 22 and 24 rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi (2002/0025484). Takeuchi teaches an electrophotographic photoreceptor having the same structure as the instant invention (paragraph 56) where a charge transport material (page 36) and a similar binder resin (paragraph 54) are applied to a support through the use of a similar solvent (paragraph

Art Unit: 1756

74). The photoreceptor taught by Takeuchi includes similar hole transport material (paragraph 62) and electron transport material (paragraph 63). It would have been obvious to one of ordinary skill in the art to use any art recognized equivalents of the components of the photoreceptor and apparatus taught by Takeuchi because of the well known use of such and the expectation of similar performance in art recognized configurations including well known drums and cartridges.
